

Amendments to the Claims:

Listing of the Claims:

1. (currently amended) An integrated system comprising:
a portal having at least one software tool for analyzing, organizing and sorting at least one form of data for access by at least one community of users, each community having secured access to at least one form of data relevant to said community;
a server communicating with said portal;
at least one wireless local area network in communication with said server;
at least one mobile device in wireless communication with said at least one wireless local area network;
a visual data device in communication with said at least one mobile device; and
a means for enabling two-way communications between said portal and said server,
wherein said at least one mobile device comprises a PC tablet.
2. (previously presented) The integrated system of claim 1, wherein said portal may be accessed by at least one mobile device in communication with said portal.
3. (original) The integrated system of claim 1, wherein said at least one local area network is physically integrated with said server.
4. (original) The integrated system of claim 1, wherein said at least one local area network is in wireless communication with said server.
5. (cancelled).
6. (previously presented) The integrated system of claim 1, wherein said visual data device comprises a borescope.
7. (previously presented) The integrated system of claim 6, wherein said borescope communicates with said mobile device via a data feed wire.

8. (previously presented) The integrated system of claim 7, wherein said mobile device comprises at least one USB port for receiving said data feed wire.

9. (cancelled).

10. (previously presented) The integrated system of claim 19, wherein said stereographic viewing system comprises a stereo image lens in communication with said at least one mobile device.

11. (previously presented) The integrated system of claim 10, wherein said at least one mobile device comprises at least one USB port for receiving data from said stereo image lens.

12. (original) The integrated system of claim 1, wherein said server is addressable by a unique IP address and wherein said server hosts at least one web page.

13. (previously presented) The integrated system of claim 1, wherein said server is located on said at least one movable platform comprising one of the following: a boat, an airplane, a spacecraft, an automobile or a truck.

14. (currently amended) A method for providing remote, interactive visual analysis of an apparatus, comprising the steps of:

providing a portal having at least one software tool for analyzing, organizing and sorting visual data for access by at least one community of users, said portal in communication with at least one electronic device;

providing a server in two-way communication with said portal via the internet;

integrating said server into a wireless local area network;

connecting at least one mobile device to said local area network;

providing said visual data from at least one visual device to said at least one mobile device;

receiving said visual data at said at least one electronic device;
accessing securely via said server said visual data relevant to each of said at least one community of users; and
analyzing a turbine engine of the apparatus using said visual data.

15. (original) The method of claim 14, comprising the additional step of issuing control commands to said at least one visual device from said at least one electronic device.

16. (original) The method of claim 15, wherein said control commands are issued in response to receiving said visual data by said at least one electronic device.

17. (original) The method of claim 16, further comprising altering an orientation of said visual device in accordance with said control commands.

18. (original) The method of claim 14, wherein said receiving of said visual data is limited by a community affiliation of said one or more electronic devices.

19. (currently amended) The integrated system of claim 1 9, wherein said visual data device comprises a stereographic viewing system.
